## Using Cryosurgery Equipment Safely - Combined e-Learning & DVD Package

Many surgeries use Liquid Nitrogen Cryosurgery (sometimes called cryotherapy) as the most efficient method for the controlled destruction and removal of unwanted lesions, especially on the skin.

The equipment needed to undertake cryosurgery consists of a storage vessel, which contains liquid nitrogen and a CryoPro® applicator. CryoService are a leading supplier of this equipment to the cryosurgery market.

The CryoPro® applicator ensures that the liquid nitrogen is applied with a high degree of control and accuracy, by using a variety of spray tips and contact probes. There are different procedures for lesions of different sizes and types.

It is essential that all members of staff who are involved in either the handling, storage, filling or use of the CryoPro® applicator and liquid nitrogen storage vessel are fully trained.

Our training package is designed to help clinics meet their legal training requirements to ensure their staff work safely with liquid nitrogen and operate the CryoPro® applicator correctly.

The training consists of an e-Learning workshop that provides safety information regarding the use of liquid nitrogen, plus a DVD that gives guidance on using the CryoPro® applicator safely. It is essential that staff complete the e-Learning and view the DVD before using the CryoPro®.

Please visit [www.cryoservice-safety-training](http://www.cryoservice-safety-training) and click on **Using Cryosurgery Equipment Safely** to;

- View an online demo of the e-Learning content
- Purchase the training package
- Find out further information

### Benefits for your organisation & your staff

- **Compliance** - You can efficiently ensure that your staff receive specific training relating to the safe use of cryosurgery equipment
- **Easy to organise** - You don't have to find a date and location to suit all staff
- **Easy to audit** - Managers are able to check employees progress and results
- **Cost effective** - High quality affordable training without the additional cost of conference facilities and travel expenses
- **Minimal disruption** - Does not require the absence of employees from the workplace  
Our modules can fit into the busiest schedules at times which suit workload
- **Enjoyable** - By providing your staff with the highest quality content you will not only keep staff up to date but interested as well
- **Convenience** - Staff can study at a time and location that suits them
- **Relevant** - To their job and health and safety responsibilities
- **Immediate** - Individuals can start training at the click of a mouse
- **Motivation** - Increased motivation in learning is a natural consequence of the engaging nature of the training content
- **Interactive** - Instant feedback during the e-Learning workshop so that staff can reflect on their mistakes as and when they happen
- **Easy to use** - The e-Learning is suited to all computer skill levels

# Using Cryosurgery Equipment Safely

*In association with Gas Safe Interactive*

This training package is designed for staff who use liquid nitrogen for cryosurgery

## Using Cryosurgery Equipment Safely - Training content

### Part One: e-Learning

The e-learning part of the training package is completed first. The online workshop consists of 3 short modules:-

- Introduction to cryosurgery
- Cryogenic vessels
- Using the CryoPro® applicator

These 3 modules will cover the following:-

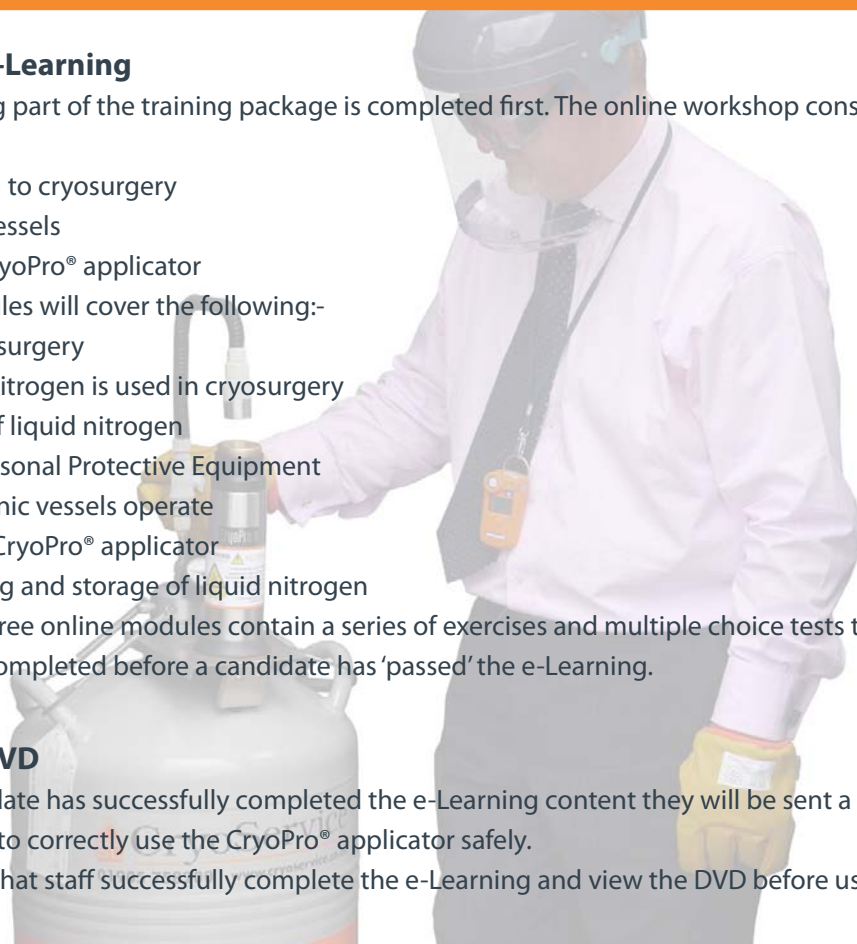

- What is cryosurgery
- Why liquid nitrogen is used in cryosurgery
- Properties of liquid nitrogen
- Essential Personal Protective Equipment
- How cryogenic vessels operate
- Filling your CryoPro® applicator
- Safe handling and storage of liquid nitrogen

Each of the three online modules contain a series of exercises and multiple choice tests that must be successfully completed before a candidate has 'passed' the e-Learning.

### Part Two: DVD

Once a candidate has successfully completed the e-Learning content they will be sent a DVD, which explains how to correctly use the CryoPro® applicator safely.

It is essential that staff successfully complete the e-Learning and view the DVD before using the CryoPro®

## How much does it cost?

### ● Using Cryosurgery Equipment Safely

The training package comprises of one e-Learning code and one copy of the DVD per candidate, with certification and supporting literature

The training package is priced at £75 per candidate

Discounts are available on purchases for 10 delegates or more

VAT is charged at the prevailing rate

## Frequently asked questions

- **Are there any instructions to guide me through the e-Learning?**  
Yes, you will receive candidate guidance notes to help you register the Workshop Code we provide. The workshops contain simple instructions that will help you to understand the format of the training and show you how to navigate
- **Do I have to download any additional software before I can study the e-Learning?**  
No, the modules are designed to run on your system as it currently operates
- **How is the cryosurgery training different to just reading a book?**  
The e-Learning and DVD include graphics, tips and real world examples, all designed to keep the training engaging and entertaining
- **How long should it take me to complete the training?**  
The e-Learning consists of three modules. They should take about 60-70 minutes to complete. The DVD that explains how to use the CryoPro® applicator will be sent to you once you have successfully completed the e-Learning. It is just under 15 minutes long. There's no need to worry about completing the training in one sitting; you can log-in and out of the e-Learning and study at your own pace. It is available 24 hours a day
- **I'm not very good with computers, will the e-Learning be difficult?**  
No, the e-Learning has been designed in association with IT professionals and is suited to all computer skill levels
- **If I can not finish the e-Learning today, can I pick up later where I left off?**  
Yes, when you exit a module before completing it, a bookmark is automatically placed. You can pick up where you left off, even if you subsequently use a different computer
- **Will I get any course literature?**  
Yes, it will be sent on successful completion of the e-Learning, but it's advisable to take notes as you work through each module to help you with the test at the end of the module
- **Will I get a certificate?**  
Yes, provided you achieve 75% or more correct answers in the e-Learning we will send you a certificate to show you have successfully completed it
- **How much does it cost?**  
This package comprises of one e-Learning code and one copy of the DVD per candidate, with certification and supporting literature  
The training package is priced at £75 per candidate  
Discounts are available on purchases for 10 delegates or more  
VAT charged at prevailing rate
